

How to Make Cricut Foil Projects Using Egg Shapes

Foil Eggs

Fun with your Cricut foil Transfer kit

Wondering what to do with your Cricut Foil Transfer Kit? Here is a simple idea that you can make for Easter or any other occasion. Today, the project is to make some foiled Easter eggs using cardstock that you can use in many different projects.

The Cricut Foil Transfer Kit is a fun way to add so much to your papercrafts, leather makes, and even on some vinyls.

For this project you can get the template from my [resource library](#) - look for asset #324

This post does contain some affiliate links for your convenience (which means if you make a purchase after clicking a link I will earn a small commission but it won't cost you a penny more)! Read my full [disclosure policy](#).

Foiled Egg Materials

- ✓ [Cricut Maker or Air 2 with Standard Grip Mat](#)
- ✓ Cricut Foil Quill Transfer Kit
- ✓ Foil sheets
- ✓ Cardstock
- ✓ Glue, double-sided tape, or foam glue pads
- ✓ Scissors
- ✓ Premade folded cards
- ✓ Template from my [Resource library](#) (asset #324)

Paper Daffodil Step-by-Step Guide

Step One - Download the Resources

For this project you will need to download the foil eggs file from my resource library (asset#324). After you have downloaded the file, unzip the file and then upload the SVG file to Design Space.

Step Two - Design Space Adjustments

Once you have uploaded the file, you will need to put it on the Canvas so you can start using all the different patterns.

The first item on the list is to make sure nothing is Attached or Grouped. Start by Ungrouping the file, then selecting the eggs and Detach the ones that are attached to each other.

For all the eggs that are set to "pen", change these to "Foil-medium" or "Foil-fine". This way these designs can be foiled onto any shape you wish.

For the foil designs, you will want to add a shape in behind. For this project, start with a circle, unlock the shape and make it into an oval. Fit the oval behind one of the foil eggs and adjust the sizing until it is the way you want it to look. Then click on the lock to set the shape in place. You can use the same shape for the other eggs as well.

Next duplicate the shape enough times so you have one for each of the eggs that will be foiled. Set the shapes to be arranged to the back. This way the foiling will be on top.

Place one of the shapes behind one of the foil eggs and align them horizontally and vertically (select both shapes to do this). Once they are centered, click on Attach. Do the same for the other 5 eggs.

Step Three - Cut egg shapes

There are also 6 other eggs that can be cut out of cardstock or vinyl. You do not need to do anything with these except I would change the color to the same so they fit on one mat.

Once you have all your eggs prepped, it is time to save your project and click on Make It.

Step Four - Adjusting your mats

If you simply want to foil all your eggs onto the same cardstock you will not need to make any adjustments.

My suggestion is to foil each egg on a different color cardstock. To do this, space out the eggs so they occupy a 4" by 4" space on the mat. Also, try and place everything towards the bottom of the mat to make it easier for removing the foil tape.

By doing this, you will be able to cut pieces of 4 x 4 cardstock and place them on the mat at the appropriate place. This way it will be easy to tape down the foil.

Do the same for the cut eggs.

Click on Continue then prepare your foil mat. Tape down the foil over the eggs. Tape the sides and the top and bottom.

Follow the directions set out by your Cricut machine for which tools to use.

NOTE: by having the foil near the bottom of the mat, it will be easier to remove it when it is time to take off the foil and switch tools.

Step Five - Assembly

Everything should be foiled and cut and ready to use in your project.

You can glue down eggs on the front of cards. Add the eggs to place holders, or simply make a banner with the eggs. The choice is yours.

In our example, we made a card and a placeholder.

Step Six - The final product

How to

FOILED EASTER EGGS

Last Word

The Cricut Foil Transfer Kit makes it so easy to add foiling to any Cricut foil projects. In this tutorial we made eggs but you can use this same technique to add other designs to your cards and other makes.

Remember that one of the secrets here is to place your material towards the bottom of the mat so that the foil is easy to remove after the foiling is done. This will save you a lot of frustration! I really hope you enjoyed making these eggs!

Until next time,

Happy Crafting...

Bette
