

PLANS FOR

CREATING A GORGEOUS BIRDHOUSE

This birdhouse will
measure

Cut the base and roof of the birdhouse
Cut to 6" wide and 8" long
Cut THREE Pieces

This part of the template is for the short sides.
Each piece should measure 6" x 4.25 "

Cut TWO Pieces

This part of the template is for the front and back. You will also need to cut a hole in one of the pieces in order to let the bird into the house

You will cut TWO pieces As Shown in RED Only cut ONE Hole unless you want a backdoor!!! See the image below for the pieces you are cutting

Also cut a 2" hole in only ONE Piece

Time To Assemble Your Birdhouse

- Step 1 - Lay the bottom on a flat surface
- Step 2 - Glue (or Nail) the back of the house to the back edge of the bottom so that the back is lined up with the bottom and there is not gap.
- Step 3 attach the two shorter sides to the bottom and back of the house - they, too, must also be flush with the edge of the bottom
- Step 4 - attach the front of the house to the sides. Only the sides need to be flush with the front, The bottom on the house to the front will have some overhand,
- Step 5 - Glue or nail the roof in place.
- Step 6 - you can add a dowel to the front if you wish, you will need to cut a hole in order to put the dowel in place.
